**Knight
Imaging**

EXPERIENCE & EXPERTISE

The specialist chair for critical care

The Autotilt Kimac is Knight Imaging's latest addition to its range of patient chairs. This range has been purpose built with intensive care units in mind; a lack of wires reduces the patient and staff trip risk.

Designed to meet patient needs in Critical Care units, the Autotilt Kimac is ideal for enabling staff to move a patient out of bed at the earliest opportunity to aid recovery.

Multi-functional

Highly manoeuvrable, the Kimac offers a low seating position and provides motorised powered positioning features, Trendelenburg tilting, and is PAT slide and hoist compatible.

Easy to use

Powered controls provide easier movement and optimum patient positioning.

PATIENT WEIGHT
Up to 240 kgs
(37.8 Stone)

Powered positioning features

Particularly low seating position

Trendelenburg tilting

PAT slide and hoist compatible

Height adjustable

Weight rated with the heavier patient in mind

Service and Support

Knight Imaging offers service and support on our range of couches and chairs. We carry out one-off service calls, yearly preventative maintenance visits as well as offering support contracts.

Planned Preventative Maintenance

Our fully trained engineers service your couches and chairs ensuring that any potential issues are spotted and brought to your attention before they become a problem.

We typically carry out these types of services across entire departments ensuring the best possible lifetime of your couches and chairs. We will always arrange visits in advance to ensure a swift turnaround and to minimise disruption to your ward or department.

A preventative maintenance visit can be arranged whenever you think you need to have your equipment inspected and checked for faults or potential future problems. Just get in touch to discuss your equipment and make a booking.

Breakdown Response

Fully prepared, with a team of experienced engineers and an availability of parts for all the couches and chairs in the range, Knight Imaging is ideally placed to diagnose and repair in times of emergency.
